

reNEW

with EMP Lightning® Mineral Complex

Moisturizer

reNEW Moisturizer is an innovative approach to personalized skincare. It offers carefully selected plant-based ingredients that provide nourishment in abundance. It spreads easily, absorbs fast, soothes dry, sensitive skin, and adds plenty of moisture to keep the skin supple, healthy and youthful. Additionally, we decided to add the world's most powerful micronutrient blend. EMP Lightning® Mineral Complex is applied so that these vital nutrients can be absorbed through the skin.

reNEW Moisturizer is intended to be used in conjunction with the All-in-One skincare. Combine the two products to create any different weight of moisturizer you may need during different seasons or periods of your life.

daily moisturizer / makeup primer
(For every-day use)

After using reNEW All-in-One, rinse with warm water, pat dry, then apply reNEW moisturizer.

night cream

(For productive skin nourishment overnight)

ingredient highlights

CALENDULA OIL

This naturally occurring antiodidant has antiseptic properties, which are helpful for treating wounds and preventing acne. As a skin conditioner, Calendula Extract stimulates collagen production and it also reduces the occurrence of dry skin.

ACAI SEED OIL

This oil is loaded with antioxidants, a warrior in the anti-aging crusade. Abundant in vitamins A, B, C, and E, as well as minerals, Acai berry extract helps revive skin, heal damaged skin cells, and restore moisture.

ANTARCTICINE SA®

This Glycoprotein found in the Antarctic Sea has cryoprotective, restructuring and anti wrinkle properties. When the bacterial strain, *Pseudoalteromonas Antarctica* was found by scientists, they observed that during growth, the bacteria produced an extracellular material, an exopolymer of glycoproteins believed to help the bacteria retain water, adhere to surfaces, withstand the extreme cold, and assisted in regenerating and protecting the skin.

In cosmetics, Antarcticine® maintains its natural bioprotective properties and promotes keratinocyte growth and fibroblast adhesion for a skin regenerating effect and enhanced wound healing. It also helps the skin retain water, preventing cutaneous dryness. Antarcticine® presents a cryoprotective effect due to its ability to modify the morphology of ice crystals. It has been found to Increase collagen type I and IV, as well as elastin, resulting in a restructured skin and a reduction in wrinkles, especially the depth of wrinkles on the forehead and around the eyes

PASSION FRUIT SEED OIL

This wonderful plant oil can improve the look and feel of dry skin and has documented skin-soothing properties. It's also a source of lycopene, and antioxidants.

SHEA BUTTER

This ingredient is full of nutrients, including vitamin A, which has been known to aid in treating blemishes, wrinkles, eczema and dermatitis, as well as burns and even stretch marks. Shea butter is packed with antioxidants like vitamin E, as well as polyphenols and phytonutrients. These ingredients make shea butter an anti-inflammatory, which is why it works so well at healing, moisturizing, and soothing all types of skin.

SUNFLOWER SEED OIL

The natural occurrence of carotenoids in Sunflower Seed Oil makes it an excellent solution for people suffering with acne. Using a gentle skin cleanser and then applying Sunflower Seed Oil based products directly on your acne prone areas helps to get rid of acne issues. The presence of antioxidants like Vitamin A and C makes Sunflower Seed Oil an excellent anti-aging ingredient because it manages to protect the skin from free radical damage as well as sun damage. As a result, wrinkles and fine lines are diminished and the skin gets a youthful and radiant complexion. Other popular nutrients found in Sunflower Seed Oil include Copper, Palmitic acid, Omega-6 fatty acids, Iron, Calcium and Zinc.

JOJOBA OIL

In 2012, a German Study found that a clay jojoba oil facial mask was effective in healing skin lesions and mild acne. Participants who applied jojoba oil masks two to three times per week saw a significant decrease in inflammation, lesions, and acne. One case study found that jojoba oil worked as an herbal drug to reduce acne symptoms. The theory behind jojoba oil as an effective acne treatment is that jojoba oil signals your skin to balance itself. Technically a wax ester instead of an oil, jojoba oil resembles human sebum.

RICE BRAN OIL

This naturally accruing oil contains palmitic, stearic, oleic, and linoleic acids. Other components include antioxidants such as tocopherols, which condition and protect the skin. Rice Bran Oil functions as a skin-softening agent, especially for dry skin.

ALOE BARBADENSIS LEAF JUICE

This ingredient soothes skin, is anti-inflammatory, has burn healing and scar reducing effects, and has wound healing properties. Aloe also protects the skin from UV damage.
