## ABOUT

Prosper is a powerful combination of prebiotics, probiotics, and digestive enzymes designed to optimize gut health. Probiotics are tiny living microorganisms that are vital to the body's ability to digest food and absorb nutrients. Digestive supplements improve gut health by increasing the number of probiotics in the gastrointestinal (GI) tract. Other probiotics pack tens of billions of living cultures into a pill hoping at least 2-3% survive. Prosper is different because the probiotics are delivered in spore form. Nearly 100% of the spores are able to survive the harsh conditions of the stomach so they can safely find a home in the GI tract—right where they should be. That means 4 billion CFU in Prosper provides far more surviving probiotics than you would get with any other probiotic supplement.

Research has shown that there is a strong connection between the gut and the brain. The gut is where our daily nutrient intake is absorbed from the food we eat and the supplements we take. On the other hand, the brain is the highest consumer of energy in the body. This energy comes in the form of those vital nutrients that we take in. So if the gut is absorbing lots of nutrients, then we know our brain is getting them as well. Healthy gut, healthy brain!\*

## FLAVOR

Watermelon

## INSTRUCTIONS

Do not mix with water. Simply shake the packet, pour the contents into your mouth, and swallow.

We recommend starting with 1 stick by mouth per day, preferably after a meal.
